Extended Fly: 19 oz. ProStructure Vinyl	545	655	735	800	955
<p>Pole Sets—Machine stress rated lumber (MSR). Ridge poles and upright ridge-support poles (no side poles required). Ridge poles 16' and longer couple together—couplers included. Available in standard and extended sizes.</p>					
For Standard Fly	\$125	\$180	\$215	\$215	\$230
For Extended Fly	\$230	\$255	\$310	\$310	\$320
<p>Deck Hardware—For easy sidewall roll up. Hanger bolts with nylon wing nuts anchor the bottom of the tent to the platform.</p>					
Set	\$12	\$13	\$15	\$17	\$19
<p>Stovepipe Outlet—Military specification stovepipe outlet. Silicone impregnated fiberglass. Rain flap, tiebacks and rain diverter.</p>					
One size fits all. Order two outlets when ordering with a fly.					\$80
<p>Sidewall Window—Nominal 30" x 30" mosquito net window with zippered flap</p>					
Flap fabric matches tent fabric					\$80

Please see other side for additional ordering and shipping information.

THE CIMARRON PLATFORM TENT

This tent is designed to be pitched on a platform, with integrated side rails to support the sidewall of the tent. The platform adds stability and eliminates the need for side poles and stakes. Platforms are not provided, but construction drawings are available here: <http://www.coloradoyurt.com/tents/deck-designs/>

FEATURES

- Natural cotton color for a luminous interior. Forest Green or Khaki walls are available.
- All tents have front and rear door openings with 12" storm flaps, Velcro-web door fasteners and quick release tieback straps.
- Roll-up sidewalls join the end walls at the corners with 2" Velcro and cam buckles. When rolled up, sidewalls stow with quick release tieback straps.
- Hardcore reinforcing throughout:
 - Spur grommets in 2" webbing at the hem and eaves for secure deck attachment.
 - Tent ridge reinforced with 8" wide chafing strip and tear resistant vinyl.
 - Corners reinforced with two layers of fabric and hidden vinyl.
- Eave ropes and storage bag included.

OPTIONS

- Mosquito net walls (tightly woven, flame retardant fiberglass) are sewn into the tent to create a screen room when the canvas walls are rolled up. Durable construction with spur grommets and 2" webbing at the hems. Select mosquito netting for all four sides or just the front and back.
- The tent fly is flame retardant Tan vinyl, with welded seam construction (see fabric choices below). The fly forms a canopy over the tent for rain, cooling and UV protection. Includes ropes for tensioning to the side rails. Choose: standard or extended fly. Standard fly covers the tent with a 12" overhang. Extended fly creates an additional 8' front porch.
- Also available: pole sets, pitching hardware, stove-pipe outlets, sidewall windows and deck plans. See pricelist for details.

FABRIC CHOICES

Tent Fabrics: Marine treated Sunforger, 100% cotton army duck. Water and mildew repellent. UV resistant. Natural cotton color. Choose for weight and flame resistance:

- 13 oz. SUNFORGER MARINE
- 13 oz. SUNFORGER MARINE FLAME RETARDANT
